OEM Door Lock Actuator

Identical in fit, form and function.

- › Original equipment manufacturer
- › Exact fit for simplified installation and no comebacks
- › Durable construction for long service life
- › Actuators for fuel doors, trunk lids, and life gates also available
- › Built in ISO certified facilities

Continental Door Lock Actuators are the genuine OEM part. They are identical in fit, form, and function and provide the exact quality of OE components supplied to auto manufacturers worldwide. Our control elements provide reliability at the touch of a button.

These actuators are controlled by the central locking system and/or the remote control. Each actuator's motor operates a lifter that activates and deactivates the lock. Additionally, the lifter may be retained by a latch mechanism and used specifically for anti-theft protection. When power locks stop functioning, it's usually because the door lock actuator has failed. We

have the OE-quality replacement parts you and your customers need. Continental Door Lock Actuators provide trouble-free installation and work the first time every time. They're built in ISO certified facilities to the same specifications and quality standards as the OE door lock actuators we supply to automakers around the world. It's the quality, coverage, and reliability your shop and customers demand. Continental is one of the largest original equipment manufacturers in the world.

Don't question the part you are installing, choose Continental OEM parts every time.

OEM Door Lock Actuators Application Coverage

Continental Part Number	OEM Part Number	Description	Applications
AC10017	67 11 8 368 196	Door Lock Actuator	02-00 BMW Z8
