

Ultrasonic Sensor Kit

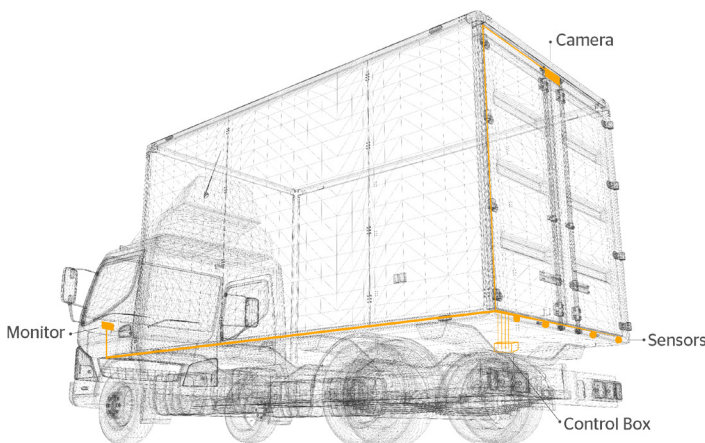

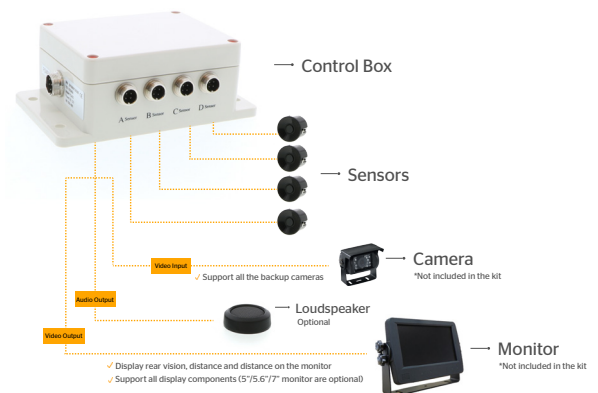

Back-up with confidence

The Ultrasonic Sensor Kit is a 4 sensor back up detection system that warns the operator of obstacles behind the vehicle. When paired with a backup camera, the system overlays the active sensors and the object distance on the monitor. The speaker provides an audible alarm to the operator when objects are within 3 meters of the vehicle.

Features

- › Audible alarm with varying frequency (faster beeping as the object gets closer)
- › Voice announcement of object distance at preprogrammed intervals
- › When paired with a back-up camera system, monitor overlay shows active sensor and object distance
- › Easy installation for vehicle retrofit

Technical Specifications

Number of sensors	4
Operating Voltage	+10 V ... 18 V DC
Operating Temperature	-20 °C ... +70 °C
Storage Temperature	-20 °C ... +85 °C
Protection Degree	ECU IP66. Sensors IP67 Speaker IP44
Ultrasonic Frequency	40Khz
Detecting Distance	0.60---5.00m (2ft 0in --- 16ft 6in)
