

## OE Flex Fuel Sensors

### Genuine quality of OE components.

- › Original equipment parts for simplified installation and fewer comebacks
- › Vehicle specific fit and function
- › Simplified ‘plug-and-play’ installation
- › Made in ISO certified facilities
- › Competitively priced

Continental now offers a line of original equipment Flex Fuel Sensors. Continental Flex Fuel Sensors are the genuine OE part. They offer OE fit, form, and function and provide the genuine quality of OE components.

Continental Flex Fuel Sensors are the latest in green technology for GM vehicles. They calculate the percentage of ethanol in fuel and adjust the output signal to the ECU creating dynamic ignition timing and E85 capability.

Our Flex Fuel Sensors are built in OE ISO/TS certified facilities and are manufactured to the highest quality standards.
