

# Autodiagnos Tire 200

## Features

- › 5" touchscreen (12.7 cm diagonal)
- › WLAN updates
- › OBDII module integrated
- › Displays all sensor data: ID, tire pressure, tire temperature, frequency and battery status
- › Perform manual and OBDII relearning with integrated instructions
- › Display of sensor/service kit information with a complete image library
- › Programming of aftermarket sensors
- › ECU sensor ID matching for sensor troubleshooting
- › Read/clear TPM DTCs
- › Test function of the radio key signal
- › Full TPMS and tire reports by e-mail

## Database

- › 100 % of all OE sensors worldwide and all common aftermarket sensors, including the Schrader EZ Sensor, Alcar from Schrader, Alligator Sens-it, Huf Intellisens, VDO REDI Sensor, Hamaton T-Pro/EU-Pro, Orange DirectFit/Universal EU, Mobiletron and many more
- › 100% of all passenger cars Europe-wide equipped with TPMS
- › Including 2 years of the Update Plus Service (with free software and database updates)

## Languages

- › DE, EN, IT, FR, ES, CN, CS, DA, FI, HE, HR, HU, KO, NL, NO, PL, PT, RO, RU, SK, SL, SV, TR

## Scope of delivery

- › The Autodiagnos Tire 200 handheld device
- › OBDII cable
- › USB-C data cable
- › Charger incl. EU, UK and US adapter
- › Carrying case

## Technical specifications of handheld device

- › Weight: 640 g
- › Dimensions: 218.3 mm x 119.5 mm x 42.6 mm

## Article number

28-0402-0007-2-01

# Autodiagnos Tire 200

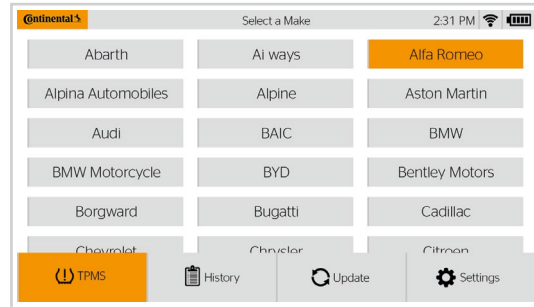

The independent solution with smart operating comfort.

## As easy to use as a tablet.

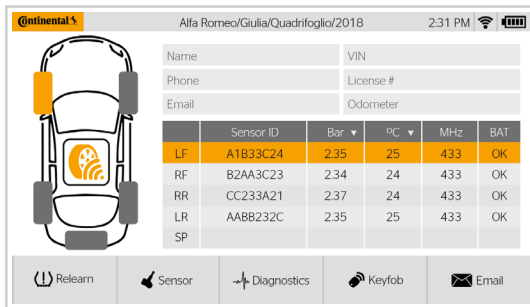

The touchscreen enables intuitive and cutting-edge operation - customer data and reports can be edited at the vehicle and sent by e-mail.

## Fast vehicle and function selection.

After you select a vehicle, all the functions that can be carried out are available. The dynamic menu navigation allows you to select other functions at any time without having to go back to the the main menu each time.

## TPMS information at a glance.

The vehicle screen is used for reading the sensor information - the customer information is acquired at the vehicle. All the sensor information such as sensor ID, pressure, frequency and temperature status is also displayed and can be saved as a report.

## Fast programming of universal sensors.

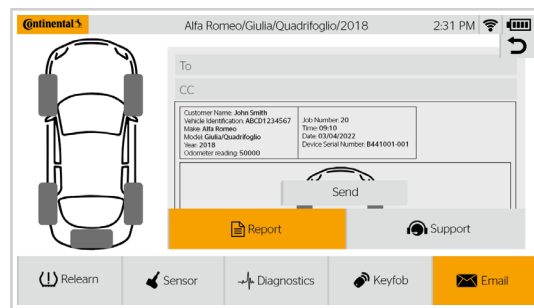

Programming of universal sensors can be done quickly, either wheel by wheel - or even for the entire set of tires at the same time, ideal for winter wheels. Subsequent relearning with the OBDII interface takes less than 90 seconds.

## Service kit for sensors.

You can use the Service Kit function to view spare part numbers and torques for sensor valves. A picture of the kit is also displayed to prevent possible identification errors.

## TPMS reports and support inquiries.

You can use the E-mail function to send complete TPMS reports to any e-mail address or submit a request to Product Support - directly from the device.
